

Think Flowtech.
Think Differently.

We live in a 'world of motion'

A world where industry challenges are evolving

People Capabilities & Skills

Shortage of specialist engineering resource in industry

The need to increase Uptime & Yield

Impacts on costs and productivity and throughout

Working Capital Constraints

Lack of inventory investment and product availability

Product & Technical Innovation

Insufficient asset investment and future proofing

Safety & Sustainability

Increased mandatory requirements and reputational risk

Everything we do at Flowtech is focused on **keeping business moving** whether that's supplying a product or designing and building a complex engineered solution.

Purpose led culture

Our Purpose

We provide power, motion and control products, systems and solutions and creating a more sustainable world.

Our Mission

To provide products and solutions to help our customers achieve their goals, saving them time and money and operating more safely and sustainably.

Our Vision

To be the trusted advisor in a world of motion.

W Winning team

O Operational excellence

L Love our customers

F Fabulous performance

Who we are

The trusted advisor

Biggest Fluid Power Stockist
in the UK & Ireland

Over 560 highly skilled people

Market leading product ranges
& availability

Access to all superior
global brands

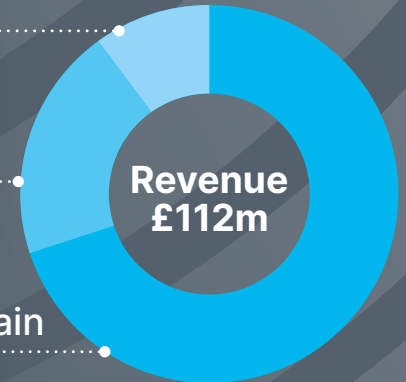

Extensive suite of
engineering services

10% Benelux

20% Ireland

70% Great Britain

Our Network

UK

- Belfast
- Birmingham
- County Durham
- Dungannon
- Exeter
- Gloucester
- Leeds
- Liverpool
- Ludlow
- Skelmersdale
- South Wales

Ireland

- Cork
- Dublin

Netherlands

- Deventer
- Rotterdam

Belgium

- Brussels

What We Do

The largest provider of Fluid Power products and services.

1

We are a high service, product provider

2

We design, manufacture, repair and overhaul assets

3

We deliver major engineering projects and onsite solutions

High Service Technical Product Provider

Pneumatics

Hydraulics

Process
& Filtration

Instrumentation,
Measurement
& Test

Pumps
& Valves

Industrial
& General
Maintenance

The Largest Range of Technical Products

- 75,000 products in stock, same day despatch
- Over 250,000 additional products available
- £50m of inventory
- 2,900 global suppliers
- Own brand range FT Pro

Products Related Services

- Vendor managed inventory
- Kitting
- Consignment stock
- Modification
- Customisation

Design, manufacture, repair and overhaul assets

Our Manufacturing Offer

- Power packs
- Panels & switch gear
- Filtration
- High pressure equipment
- Pipework
- Compressor air systems
- Valve assemblies
- Lubrication systems
- Fuelling technology

Our Services Offer

- Testing & calibration
- Motors & gearboxes
- Cylinders
- Pumps
- Power packs
- Valves
- Low voltage
- Calibration services
- Fuelling system installation

Underpinned with CAD, CNC, welding, fabrication
& panel building services.

Major Engineering Projects & Onsite Services

Engineering Projects

- In house design and install
- Custom made engineering solutions
- Filtration and purification systems
- Turnkey hydraulic systems

Onsite Services

- Fluid Power and electrical repair services
- Onsite diagnostics
- Maintenance and repair
- Predictive maintenance services

We installed brand new HPU's and replaced all old pipework, pressure tested and flushed. **To keep the famous Tower Bridge moving for many more years.**

Expert industry sector knowledge

& Systems

Our Supplier Partnerships

We offer **industry leading brands** and expertly engineered solutions for all your **fluid power** needs.

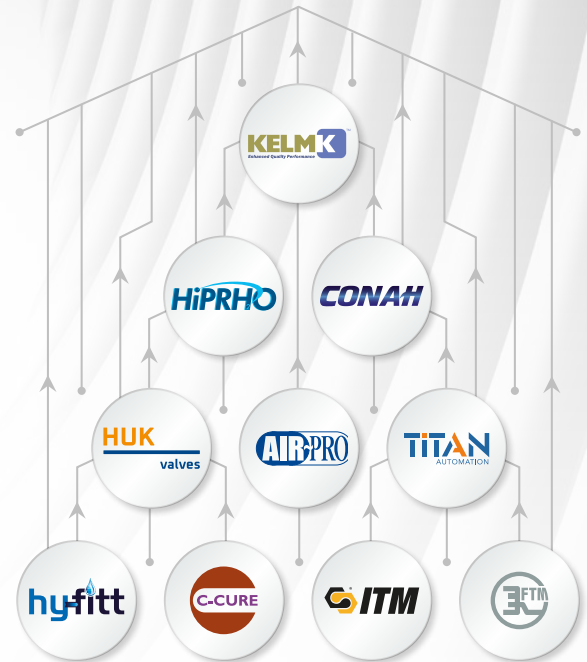

For the engineer.

Introducing FT Pro

Bringing together ten leading brands into one single brand leader.

FT Pro offers an extensive range of high quality professionally engineered products, that are designed to suit the unique requirements of all industries. Our products are designed by engineers to be reliable and long-lasting, ensuring that your equipment operates smoothly and reliably.

With FT Pro products, you can be confident that your applications will run efficiently, no matter how demanding the conditions.
